PREFACE

The compilation of a comprehensive bibliography is a tedious and time consuming task yet it is one of the most important tasks in any research assignment. In the case of this bibliography, the task took over two years. In total, over three thousand individual entries were collected. Because of the large number of citations involved, it was decided to divide the bibliography into two sections. The first section (Part I) consists of general citations regarding the state-higher education relationship. The second section (Part II) consists of citations referring to the state-higher education relationship in specific states.

A number of persons have contributed their suggestions to this effort. Dr. Richard Millard, Ms. Nancy Berve, Dr. Lyman Glenny and Dr. Jerry L. Miller. Dr. Robert O. Berdahl deserves special recognition for this overall guidance of the project and his careful review of the various drafts. Any omissions or errors which remain, however, are the sole responsibility of the compiler.
